

# Ultra 3-D Sod®

UNIMAGINABLE

Solutions for your Environment™

## Powerful Sod Solution

All around high performance including drought, wear and shade tolerance, as well as naturally dark green color. Ultra 3-D Sod produces a very uniform turf with a medium texture and excellent density. Moreover, mature sod performs well with moderate annual fertility. These characteristics makes for an unsurpassed sod product that is applicable for use on sports fields, home lawns, and elite golf courses.

- Very Uniform – Dark Green Color
- Requires less Seed Per Acre
- Moderate Nitrogen Needs
- High Seed Count Varieties
- Enhanced for Improved Performance
- A Blend of Two Super Elite KBG's
- Reduced Inputs
- Long Term Sod Solution

### DARKER:

3-D Sod has been specially designed to yield a naturally darker turf. Simply put, this means less fertilizing! You'll be able to have the same rich green lawn you expect without the use of costly and sometimes harmful chemicals.

### DENSER:

Aside from the aesthetic beauty of a thick lawn, 3-D Sod's improved density will help compete with weeds by actually squeezing them out! Plus, 3-D Sod will green-up quick in the spring giving you the first green lawn on the block.

### DWARFER:

Our 3-D Sod provides less vertical growth and a lower canopy height. It's an attribute with a benefit that is terribly simple to understand... less mowing! Stop spending all weekend working on your lawn rather than just enjoying it.
